<p>Investment Strategy</p>	
<ul style="list-style-type: none"> The Fund will invest primarily in a broadly diversified portfolio of collective investment schemes (including ETFs and REITs) debt securities and cash. The investments of the Fund may be allocated in different geographical regions without concentration toward any single country, sector, or industry. The Manager will implement investment decisions based on the global Multi-Asset Solutions Team’s (MAST) strategic, long-term asset allocation and, where appropriate, shorter-term tactical asset allocation views to arrive at the desired portfolio positioning. Once investment views on each asset class are formulated, the Manager will calibrate the preferred and targeted asset class exposures as well as determining building block and instrument selection. Asset allocation of the Fund is reviewed on an ongoing basis and may be adjusted if there have been material market movements, opportunities for additional return generation are identified, or in consideration of the volatility limit. The Fund and the underlying funds may employ derivatives for the purpose of investment, optimising returns, hedging and/or efficient portfolio management. 	<p>Refer to “Investment Focus and Approach of MECF” in Schedule 8 of the Prospectus for further information on the investment strategy of the product.</p>
