KEY RISKS	
<p>WHAT ARE THE KEY RISKS OF THIS INVESTMENT?</p> <p>The value of the product and its dividends or coupons may rise or fall. These risk factors may cause you to lose some or all of your investment and your principal may be at risk:</p>	<p>Refer to “Risks” and “Specific Risks of Investments in MGAAGF” in Schedule 4 of the Prospectus for further information.</p>
Market and Credit Risks	
<ul style="list-style-type: none"> You are exposed to securities risk. Investment in securities in different markets is subject to general market, political and economic conditions and the value of securities fluctuate in response to the activities and performance results of the companies invested into. You are exposed to emerging market risk. Securities in emerging markets may be more volatile and less liquid than securities of developed markets. You are exposed to interest rate and credit risk. When interest rates rise on certain currencies that the bonds are denominated in, the value of the bonds may reduce, resulting in a lower value for the relevant portfolio. The Fund is also exposed to the risk that a corporate issuer will 	

<p>default or that negative perceptions of the issuer's ability to make such payments will cause the price of that bond to decline.</p> <ul style="list-style-type: none"> You are exposed to currency risk. The base currency of the Fund is not denominated in Singapore Dollars, and the investments (including an underlying fund) and income of the Fund may be denominated in a number of different currencies other than the base currency of the Fund (or the Units thereof) and will thus be subject to fluctuations in currency exchange rates if the Manager or the Sub-Manager does not hedge the foreign currency exposure, and in certain cases, exchange controls regulations. You are exposed to high-yield bonds / debt securities rated below investment grade or unrated risk. Debt securities rated below investment grade or unrated are generally subject to lower liquidity, higher volatility and greater risk of loss of principal and interest than high-rated debt securities. You are exposed to counterparty risk. There is a risk of loss in connection with the insolvency of an issuer or a counterparty and/or its failure to perform under its contractual obligations to the Fund. 							
Liquidity Risks							
<ul style="list-style-type: none"> You can realise your Units only on Dealing Days. All realisation requests may only be made on Dealing Days to the Manager. Your realisation request may be deferred or realisation may be suspended. There may be a 10% limit on the total number of Units that can be realised on a Dealing Day. Your right to realise Units may be temporarily suspended under certain circumstances. 							
Product-Specific Risks							
<ul style="list-style-type: none"> You are exposed to financial derivative instruments ("FDIs") risk. <ul style="list-style-type: none"> The Manager and certain underlying funds may from time to time invest in FDIs (where permitted), for investment, optimising returns, hedging and/or efficient portfolio management purposes. The NAV of the Fund and such underlying funds may therefore have a certain level of volatility due to their investment policies or portfolio management techniques. Participation in FDIs may involve risks which differ from, and in some cases, greater than, the risks associated with traditional securities investments. The risks presented by FDIs include, but are not limited to, management risk, market risk, credit risk, liquidity risk and leverage risk.
