The intention of the Manager to make monthly distribution for each Class is not guaranteed, and the Manager may in future review the distribution policy depending on the prevailing market conditions.

Distributions may be made out of income and/or net capital gains. In addition, the Manager may from time to time, with the approval of the Trustee, make distributions out of capital. You should note that

KEY RISKS	
<p>WHAT ARE THE KEY RISKS OF THIS INVESTMENT?</p> <p>The value of the product and its dividends or coupons may rise or fall. These risk factors may cause you to lose some or all of your investment and your principal may be at risk:</p>	Refer to “Risks” and “Specific Risks of Investments in MSBF” in Schedule 1 of the Prospectus for further information.
Market and Credit Risks	
<ul style="list-style-type: none"> You are exposed to securities risk in the global markets. Investment in securities in the global markets is subject to general market, political and economic conditions and the value of securities fluctuate in response to the activities and performance results of the companies invested into. You are exposed to emerging market risk. Securities in emerging markets may be more volatile and less liquid than securities of developed markets. You are exposed to interest rate and credit risk. When interest rates rise on certain currencies that the bonds are denominated in, the value of the bonds may reduce, resulting in a lower value for the relevant portfolio. The Fund is also exposed to the risk that a corporate issuer will default or that negative perceptions of the issuer’s ability to make such payments will cause the price of that bond to decline. You are exposed to currency risk. The investments and income of the Fund may be denominated in a number of different currencies other than the base currency of the Fund (or the Units thereof) and will thus be subject to fluctuations in currency exchange rates if the Manager does not hedge the foreign currency exposure, and in certain cases, exchange controls regulations. You are subject to tax exposure. The Fund may invest in securities that produce income that is subject to withholding and/or income tax. Such tax may have an adverse effect on the Fund. 	

<ul style="list-style-type: none">• You are exposed to counterparty risk. There is a risk of loss in connection with the insolvency of an issuer or a counterparty and/or its failure to perform under its contractual obligations to the Fund.• You are exposed to geographical concentration risk. The concentration of the Fund's investments in securities of issuers located in any single country may result in greater volatility than portfolios which comprise broad-based global investments. The value of the Fund may be more susceptible to adverse events in that region.										
Liquidity Risks
